EXPERIENCE

Zero To Mastery Online Bootcamp — *Front-End Developer*

2022 - 2023

Training programme, designed to teach many of the desired skills & attributes necessary to succeed in the hi-tech world. Autonomous learning alongside a structure to produce well rounded front-End developers.

Tech Stack: Html,Css, Javascript, ReactJS, NodeJS,TypeScript,Tailwind,Redux, Firebase.

Zero To Mastery Online Bootcamp — *JavaScript Developer*

2022 - 2023

To build a joke teller project, I first created the basic structure of the web page using HTML and styled it using CSS. I then used JavaScript to fetch jokes from an API and display them on the web page. I added interactivity to the project by allowing users to select joke categories and triggering the joke-fetching function. Finally, I tested the project thoroughly and optimized it for performance and user experience..

Tech Stack:Html,Css, Javascript

Zero To Mastery Online Bootcamp — *React Developer*

2022 - 2023

To build an e-commerce website, I first created the basic structure using HTML and styled it using CSS. I then used React to create dynamic, interactive components for product listings, cart management, and checkout flows. I used TypeScript to add static typing and error checking to my codebase.

Tech Stack:Html,Css,React,Typescript

SKILLS

HTML,CSS,Tailwind

JavaScript,React JS,

TypeScript,Redux

And always open to learning more..
